When the child start the learning at the age of two years ,the most important decision for parents is the selection of right school. As per medical science , most of the brain development takes place from 2-5 years of age and it is very critical for child to grow multi - dimensional during this period for strong foundation and overall growth/development for future.

Your child deserves the best, so I leave this privilege to you to decide her your child. How ever, the moment your child joins Grow way, he/she will be fully prepared to in further education and in life.

Can we imagine the world without colours? Not at all! Nature itself has many colours, which makes the world beautiful. Colours are indeed the smiles of nature. With this objective the students from LKG and UKG celebrated Red colour day on 18<sup>th</sup> June, 2021.

On the Occasion of 7<sup>th</sup> World Yoga day our little buds participated in virtual yoga classes taken by yoga instructor Vijaya Lakshmi.

Aptly so, there's no one else who can take a teacher's place in this world. Our teachers are an extremely committed lot, who are handpicked and are professionals who impart knowledge with a vision and purpose.
